BLUE WORLD PUBLICATIONS HAS A GREEN WORLDVIEW

Blue World Publications looks to maximize resources and minimize waste

LOS ANGELES, CALIF. – March 19, 2011

David Goodberg's premiere book, ***Selected Shorts and Other Methods of Time Travel***, takes a look at the controversial repercussions of time travel in the seemingly, not so distant future. But while it is one thing to muse about what may happen someday, it is even more important to address what will happen soon. Blue World Publications wants to maximize resources and minimize waste, entailing a greener solution. That is why Blue World Publications, the publisher of ***Selected Shorts and Other Methods of Time Travel***, is making a choice when it comes to what we can do to address current issues.

Selected Shorts and Other Methods of Time Travel is printed on 100% recycled paper. While this is only a small part in that grand scheme of things, we at Blue World Publications fully understand the potential difference this small change can make. For example – if simply one copy of every book published in 2010 was made with recycled paper like all of Goodberg's ***Selected Shorts and Other Methods of Time Travel*** was, we could have saved thousands of trees.

Books are available at select retail stores and everywhere online. Purchases can be made through Ingram or directly Blue World Publications at <http://www.blueworldpublications.com/>. E-books are available at <http://www.smashwords.com/books/view/35799>. Information can be found on the official website: <http://www.selectedshortsthebook.com/>.
